May 21, 2019

FOR IMMEDIATE RELEASE

CITY OF SEAL BEACH PIER UPDATE

The City of Seal Beach is pleased to announce that the entire Seal Beach Pier will be open beginning Friday, May 24th at 5pm. Construction on the pier began in September of 2018 after receiving all of the necessary permits from a variety of public agencies, including the California Coastal Commission. The work involved, not only repairing the damage from the pier fire which occurred in 2016, but also completing much needed improvements to the pier's utilities, lighting, and infrastructure. Associate Engineer David Spitz managed the project and oversaw the work of the City's contractor, the John S. Meek Company.

A formal ribbon cutting will be held in the near future to celebrate the opening of the pier. In addition, the City will be hosting public workshops to discuss the option of placing a restaurant at the end of pier.

The pier is open from 6:00 a.m. to 10:00 p.m. Monday through Sunday.

More information about the pier can be found by visiting the pier improvement project website at www.sealbeachpier.org or by visiting the City's website at www.sealbeachca.org.
