Recreation Department Winter Shoreline Brochure and Programs

The Winter issue of the *Shoreline* brochure has been mailed to residents and is available at all City facilities. The brochure includes all winter programs, senior services, City news and community events.

Click [here](#) to check out the winter issue! Want to register for a class? Click [here](#) to login to the registration site.

It was a busy fall season of classes and sports programs. Thank you to all parents and participants for helping make fall 2018 a success—we hope to see everyone this winter!

Boeing Lift Station Pump Repaired

The Seal Beach Sewer Division recently encountered a pump in need of service during routine weekly checks. The Boeing Lift station serves 85 acres of commercial and industrial development with a capacity of 530 gallon per minute (GPM). Sewer stations are checked and inspected daily, weekly, and monthly while looking for indications of abnormal conditions. This station was found to be running “warm” in its electrical panel due to a worn and failing bearing. The Sewer Division maintains a stock of spare parts, including pumps and motors, and was able to respond quickly.

Slurry Seal Projects Underway

Slurry Seal projects are currently underway on the Hill, Old Town, and Bridgeport areas of Seal Beach. Work is accomplished through phasing to allow for traffic and use of the street as soon as possible. This project began by spot repairs of asphalt, then crack filling, grinding of existing thermoplastic road paints, slurry placement, and finally new roadway striping. Oils and materials must be allowed to settle before striping can begin. Street sweeping, depending on the area, is typically placed on hold to allow for residents, the community, and the contractor to have access and mitigate through potential problems. This project has incorporated safety features, such as “Continental” style crosswalks, throughout the City where applicable. The project is currently on schedule, pending any changes with the weather.

Sidewalk Repairs and Replacements

Working in between slurry seal projects, Public Works crews have been busy replacing sidewalks in need of repair. Sidewalks are removed and replaced over a short period, typically one to two days, to allow for pedestrian access over weekends. Nearby site conditions are always restored to pre-work conditions.

Don't forget to vote November 6th!
