Another Successful Run for Seal Beach Car Show

Thousands of attendees gathered on Saturday, April 27th for the 32nd Annual Seal Beach Classic Car Show. The Chamber of Commerce partnered with the City of Seal Beach to co-sponsor the popular public event, known for drawing huge crowds to Main Street.

Pump Station Maintenance

The Seal Beach Water Department is currently pulling pump motors for maintenance at the Navy Pump Station. This station has 3 million gallons of capacity and contains three 75 horsepower motors. This work will be phased, one motor at a time, to ensure system reliability while being able to provide redundancy in case of any failures.

New Signage Posts in CPW

Seal Beach contractor BC Traffic is in College Park West installing new signage posts. Many sign posts are deteriorating due to environmental conditions and will be replaced with new standardized equipment. Work is expected to take several days throughout this community.

ocfa.org

Leftover products that are corrosive, toxic, or can catch fire, react, or explode under certain circumstances are considered household hazardous waste. These products require special care to prevent fire, injury, or pollution of the environment.

Use and Storage

- Keep flammable liquids away from heat sources and open flames, such as hot water heaters and fireplaces.
- Don't smoke while using any type of flammable product, including nail polish, polish remover, alcohol-based hair products, and similar cosmetic items.
- Follow instructions on the labels of all flammable liquids and other hazardous products carefully to prevent accidents or injuries at home.
- Keep hazardous products in their original containers, and never remove labels or instructions.
- Never mix hazardous products. They might react, ignite, or explode when combined.
- Never leave household hazardous products or waste within reach of children or pets.
- Go green! Look for environmentally friendly products or search online for simple recipes using natural ingredients.

Disposal

- Never dispose of household hazardous waste in your regular trash. Once in landfills, these products can contaminate groundwater that may become a source of drinking water.
- Never dump household hazardous waste on the ground, down storm drains, or into toilets, drains, or sinks. It can seep into groundwater and waterways, contaminating lakes, the ocean, and local beaches.
- Orange County residents can dispose of household hazardous waste items for FREE at any Orange County House Hazardous Waste Collection Center.
