			Households with individuals 65 years and over	4,267,068	31.7
			Average household size	2.87	(X)

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

Renter-occupied housing units	34,678	43.8	Households with individuals under 18 years	20,376	25.8
			Households with individuals 65 years and over	26,765	33.8
			Average household size	2.50	(X)

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

Owner-occupied housing units	25,885	57.0	65 years and over	2,719	6.0
Renter-occupied housing units	19,497	43.0	Households with individuals under 18 years	14,837	32.7
			Households with individuals 65 years and over	14,047	31.0
			Average household size	2.93	(X)

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

			Households with individuals 65 years and over	2,700	34.7
			Average household size	3.52	(X)

(X) Not applicable.

[2] Table P8.

[3] In combination with one or more other races listed. May add to more than total population and more than 100% because individuals may report more than one race.

[4] Homeowner vacancy rate is the proportion of homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, "for sale only" vacant units, and vacant units that have been sold but not yet occupied; & then multiplying by 100.

[5] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units for rent by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

[6] Table P16; "Family households" consist of a household that has at least one member of the household related to the householder by birth, marriage, or adoption. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

2020 Census Demographic Profiles Orange County, CA

CITATION

Census 2020 Demographic Profile prepared by the U.S. Census Bureau, 2023.

TYPE OF FILE

Summary statistics.

SUBJECT CONTENT

The 2020 Demographic Profiles (DP) includes selected tables and measures from the 2020 Census Demographic and Housing Characteristics File (DHC) on topics such as sex, age, race, Hispanic or Latino origin, household relationship, household type, group quarters population, housing occupancy, and housing tenure. The DP includes similar data as the 2020 DHC in an easier to use format. It is available on data.census.gov.

GEOGRAPHIC CONTENT

Profiles of General Demographic Characteristics contains individual files for each of the 50 states, the District of Columbia, and Puerto Rico; and for the United States as a whole. The tables are identical for all files, but the geographic coverage differs.

For additional information, please consult U.S. Census Bureau website at:

<https://www.census.gov/data/tables/2023/dec/2020-census-dhc.html>

The preparation of this report has been financed in part through grant(s) from the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) through the U.S. Department of Transportation (DOT). The contents of this report reflect the views of the author who is responsible for the facts and accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of SCAG or DOT. This report does not constitute a standard, specification or regulation.

GLOSSARY

Housing units - A house, an apartment, a mobile home or trailer, a group of rooms, or a single room occupied as separate living quarters, or if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live separately from any other individuals in the building and which have direct access from outside the building or through a common hall. For vacant units, the criteria of separateness and direct access are applied to the intended occupants whenever possible.

Housing tenure - Refers to the distinction between owner-occupied and renter-occupied housing units.

Households By Type -Households are classified by type according to the sex of the householder and the presence of relatives. Examples include: married-couple family; male householder, no wife present; female householder, no husband present; spouse (husband/wife); child; and other relatives.

Group Quarters - Includes all people not living in households. This term includes those people residing in group quarters as of the date on which a particular survey was conducted. Two general categories of people in group quarters are recognized: 1) the institutionalized population which includes people under formally authorized supervised care or custody in institutions at the time of enumeration (such as correctional institutions, nursing homes, and juvenile institutions) and 2) the noninstitutionalized population which includes all people who live in group quarters other than institutions (such as college dormitories, military quarters, and group homes). The noninstitutionalized population includes all people who live in group quarters other than institutions.

Hispanic or Latino - For Census 2000, American Community Survey: People who identify with the terms "Hispanic" or "Latino" are those who classify themselves in one of the specific Hispanic or Latino categories listed on the Census 2010 or ACS questionnaire - "Mexican," "Puerto Rican," or "Cuban" - as well as those who indicate that they are "other Spanish, Hispanic, or Latino." Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.
