

Seal Beach WAVE

Debris Removal at College Park West

As part of the ongoing beautification efforts at College Park West (CPW), Maintenance staff were recently called in to assist with clearing several piles of debris. Working alongside the CPW resident crew, our staff hauled away five full loads of debris, helping to restore open space and improve the overall look of the park.

This cleanup not only improves the appearance of the area but also makes the park safer and more inviting for visitors. Removing excess debris allows plants and landscaping to thrive, creates cleaner walking paths, and supports the efforts of residents who have been dedicating their time to this beautification project.
