New Trees Planted in Old Town

Our Maintenance staff recently planted two beautiful strawberry trees in Old Town to replace two declining and dead trees that were removed earlier this year. Strawberry trees are a great addition to the neighborhood—they are hardy, drought-tolerant, and provide year-round greenery with seasonal blooms and fruit that add color and charm to the streetscape.

Replacing aging or unhealthy trees with new, sustainable species is part of the City's ongoing commitment to caring for our urban forest and ensuring future generations can enjoy the benefits of a vibrant tree canopy.
