## Weed Abatement at Gum Grove Park

Our Maintenance team recently partnered with our landscape contractor to complete a round of weed-abatement work in Gum Grove Park. Removing thick, dry vegetation helps lower the risk for the park's neighbors and keeps our trails safer and more enjoyable for walkers, runners, and four-legged friends alike.

Targeted weed control protects Gum Grove's native coastal habitat. Small seasonal projects like this make a big difference in keeping Gum Grove healthy, resilient, and welcoming year-round.
