

PLANT LISTING & BUYING GUIDE

OUR PARTNERS

WATER USE EFFICIENCY

African Daisy – Bright colored flowers are common to all varieties. Low-growing, flowering plant.

Baja Fairy Duster – A tall shrub with vibrant red flowers.

California Fuchsia – California-native plant that tolerates heat and drought. Leaves can be narrow or broad, silver to bright green.

Coral Bells – California-native plant that flowers in dry shade.

Desert Willow – Fast-growing, flowering large shrub. Water deeply in summer to promote flowering.

Douglas Iris – Tall shrub with lavender blue flowers that performs best in partial shade. Easy to grow.

Germander – Ground cover flowering in early summer. Performs well in full sun or partial shade and attracts beneficial insects.

Pacific Mist Manzanita – California-native evergreen shrub. Attracts hummingbirds and beneficial insects.

Sundrops – Produces bowl-shaped, bright yellow flowers and requires very little care or attention.

Texas Ranger – Attractive evergreen shrub which is extremely heat and drought tolerant.

Toyon – Also called California holly, a large shrub with dark green leaves and profuse red berries through winter.

Orange County Garden Friendly Planning & Plant Guide

Learn how to save water and eliminate runoff with OC Garden Friendly plants

Are you overwatering? You can save money and reduce runoff by installing water-efficient devices. Rebates are currently available!

- Smart irrigation timers: up to \$380 rebate
- Rotating sprinkler nozzles: \$4 (or more) rebate per nozzle
- Drip irrigation: \$175 per kit (available in limited areas)
- Turf removal: \$1 (or more) rebate per square foot

For more information, go to mwdoc.com/rebates

- Smart irrigation timers (weather-based irrigation controllers* or soil moisture sensors) automatically calculate your landscape's water needs.

*Look for WaterSense labeled products.

- Rotating sprinkler nozzles water more uniformly than traditional sprinkler heads, and they can reduce harmful water runoff that flows into the ocean.

- Drip irrigation directs water to plant roots, reducing water loss due to wind and evaporation. They are ideal for small areas.

Demonstration Gardens & Planting Concepts

Desert Museum

Palo Verde

Attractive deciduous tree with bright flowers appearing in mid spring. Water deeply once or twice a month in summer to promote flowering.

Marina Madrone

Shiny evergreen leaves with drooping flower clusters followed by berries lasting into late winter. Attractive to hummingbirds.

Gaura

A heat and drought tolerant ground cover with showy flowers.

Rock Rose

A great choice for a dry garden. Showy white, pink or rose-colored flowers appear in spring. A good ground cover.

Coast Rosemary

Attractive evergreen shrub with lavender flowers most noticeable in spring.
