WINTER SAND BERM CONSTRUCTION

SEAL BEACH, CA- The City of Seal Beach will commence construction of the annual Winter Sand Berm project starting the week of October 23rd and extend through November. Placement of the berm will be along the beach, from the pier easterly to approximately Dolphin Avenue. The construction of the berm project will be performed by Crew Inc.

In addition, this fall, the City will concurrently perform “back-passing” a process of removing beach sand from the west side of the pier and bring it to the east side of the pier. This process is performed periodically due to wave run-up transporting sand from the east beach to the west beach.

The Contractor will stage their equipment in the 10th Street beach parking lot. Public Works will have a portion of the parking lot coned-off for the Contractor starting on Monday, October 23, 2023, in preparation for the work.

For further information regarding this project, please contact David Spitz, Associate Engineer at (562) 431-2527 ext. 1331.
