

LAMPSON AVENUE BIKE LANE GAP Closure Project

FACTSHEET

ABOUT THE PROJECT

The City of Seal Beach is excited to announce plans to continue expanding bike lane paths throughout the City. In 2016, the City was awarded an Active Transportation Program ("ATP") grant to construct a Class II bike lane along Lampson Avenue. Lampson Avenue is classified as a four-lane divided secondary arterial on the Orange County Master Plan of Arterial Highway (OC MPAH).

The bike lanes will be constructed on Lampson Ave between Basswood Street and Seal Beach Boulevard, which will connect to the already existing bike lane along Lampson Avenue from Basswood Street going east. The modifications will also include bike lane signage, roadway pavement, replacement of curb ramps, traffic signals, landscaping, and limited roadway changes.

WHAT TO EXPECT

- "No Parking" signs will be posted along Lampson Ave.
- Lane restrictions are expected. Cones or other traffic control devices will be used to separate work areas from traffic.
- Please use caution and remember to reduce your speed when driving along Lampson Ave.
- Water trucks will be used to maintain dust control during construction.
- Construction noise is expected.

WHAT ARE CLASS II BIKE LANES?

Class II bike lanes are designated as an on-road bicycle lane. The lanes are typically 5-6' wide.

Construction Schedule

April 8 - August 2024

Work Hours and Days

Monday-Friday from 7:30 am - 4:30 pm

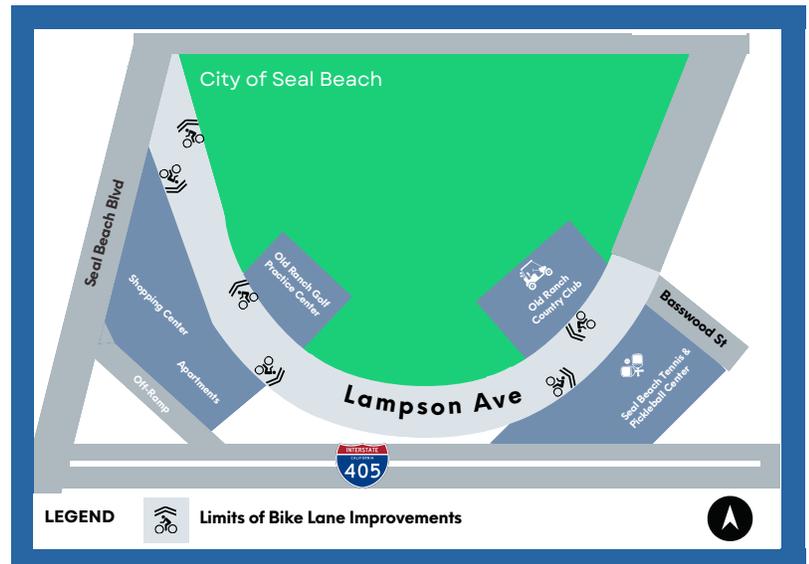

Construction Cost

\$2.3 million Funded by ATP
Federal Project No. ATPSBIL-5229(017)

Contractor

Sequel Contractors, Inc.

NOTE: The schedule is subject to change based on weather or other unexpected events without notice.
